Q.1: Create two integer variables length and breadth and assign values then check if they are square values or rectangle values.
ie: if both values are equal then it's square otherwise rectangle.

```
void main() {

  int length = 4;

  int breadth = 5;

  if (length == breadth) {

    print("It's a square");

  } else {

    print("It's a rectangle");

  }

}
```
