Q8: Create a marksheet using operators of at least 5 subjects and output should have Student Name, Student Roll Number, Class, Percentage, Grade Obtained etc. i.e: Percentage should be rounded upto 2 decimal places only.

```
void main() {

  var name = "Name : Sameer";

  var fname = "Fatther Name : Mukhtar";

  var rollnum = "Roll Number : 23485";

  print(name);

  print(fname);

  print(rollnum);

  print ("Mark Sheet");

  num english = 75;

  num math = 85;

  num urdu = 70;

  num sindhi = 75;

  num islamiat = 69;

  num totalmarks = 500;

  print("Total Marks is $totalmarks");

  num obtainedmarks = english+math+urdu+sindhi+islamiat;

  print("Obtained Marks is $obtainedmarks");
```

```
num percentage = obtainedmarks *100/totalmarks;

print("Percentage is $percentage");

if(percentage >=80)

{

  print("A+ Grade");

}

else if(percentage >=70)

{

  print("A Grade");

}

else if(percentage >=60)

{

  print("B Grade");

}

else if(percentage >=50)

{

  print("C Grade");

}

else if(percentage >=40)

{

  print("D Grade");

}

else if(percentage <=39)
```

```
  {
    print("Fail");
  }
}
```
